

Thank you for another great workshop. Your Eye Movement Integration™ training continues to be the best I've experienced any where, any time. I'm eager to apply my new learning.

Deborah Bauserman, Ed.D.

Eye Movement Integration™ is equally or more effective than EMDR, and far less complicated. Moreover, EMI™ provides a lot of security and does not require or invite regression, which in turn allows my clients to resolve their issues with far less risk of being re-traumatized.

Nancy Montagna, Ph.D.

Respectful, Intelligent, Competent Training! I just let go of a 33 year-old anxiety. That is priceless!

Barbara Altman Bruno, Ph.D.

Since the early 1980's, I've been to numerous Ericksonian-related training. This was by far at the top as far as clarity and integration. EMI™ is an immediately accessible tool I'll use as soon as I get back to work tomorrow!

Lynn G. Loomis, M.Ed., MCC

I came hoping to learn something new. I was stunned by the effectiveness of the EMI™ process. The seminar was structured perfectly for ease of learning.

Marty Nathan, LCPC

I feel this has been a wonderful program. Its the first one I've been to in a while that was really a learning experience. I feel like I have information and techniques to take back and share with colleagues and clients. I want to practice and improve my skills in this area. I also received personal help and growth and I can share this experience as well.

Teri Stanley

The EMI™ workshop was without doubt one of the better training experiences I have ever had. There was a most helpful emphasis on practical application of techniques, with adequate attention to theoretical underpinnings and historical reference.

David Thomas, Ed.D., LPC

A powerful, effective presentation of a valuable therapeutic tool.

Robert E. Courtney, DCH

This workshop greatly exceeded my expectations, and I look forward to future workshops!

Mary O. Sutcliffe, LCSW-C

I was troubled by a PTSD- related response that was causing me increasing distress despite several years of psychotherapy. During the Eye Movement Integration Seminar, I volunteered to be a demonstration subject, and after an amazingly brief intervention, the response was gone! It has been two months since the seminar and I have had no recurrence. It is wonderful!

L. Merl, LICSW
